# Marcos Vinicius Pinheiro Rodrigues

**Senior Mobile Engineer · Flutter & Dart | Financial & Insurance Markets**

linkedin.com/in/vnxdeveloper · github.com/viniciusvinny233 · viniciusvinny233@gmail.com · vnxdeveloper.com · (11) 98818-5634 · São Paulo, SP, Brazil

Mobile Engineer with **6 years of experience**, specializing in **Flutter & Dart** for the financial, banking, and insurance markets. Responsible for applications with over **1.2M users**, scalable architecture (**Clean Architecture, MVVM**), and end-to-end product vision — from solution design to deployment on the App Store and Google Play. I develop and maintain proprietary products from scratch to market.

## TECHNICAL SKILLS

Flutter & Dart · iOS & Android · React.js & Next.js · TypeScript & JavaScript · Clean Architecture & SOLID · MVVM · BLoC / Cubit / GetX · Riverpod / Zustand · Flutter Modular · Firebase & Supabase · REST APIs & Integrations · TDD · Jest · Cypress · Mocktail · CI/CD · CodeMagic · Golden Tests & Widget Testing · Python · Scrum / Kanban · Jira · Git & GitHub · Figma & UI/UX · MVC · Swagger · Cloudflare

## PROFESSIONAL EXPERIENCE

### Mobile Engineer — Tokio Marine Seguradora — Insurance
Aug 2025 – Present

I lead the **Mobile** development of the **Super App** in **Flutter** — a single codebase for **iOS, Android, and Web** with **+1.2M users**; architecture guided by **Clean Architecture, MVVM, and Flutter Modular**, with state management via **BLoC and Cubit**. Led the complete rebuild of the App's **Payments section**, implementing **Pix, Boleto, Credit Card, Google Pay, and Apple Pay** flows (iOS, Android, and Web) with native **Swift** integration for Apple methods — a section that processes **~50k transactions/month**. Led the redesign of **Tokio Indica** (Benefits Marketplace), integrating partners like **Localiza, Rappi, Hoteis.com, and Sephora** with zero-friction UX and cross-platform parity. Deployed an **AI Agent (LLM)** to analyze and respond to store reviews, raising the App's rating from **4.0 to 4.7** ⭐.

### Mobile Engineer — Brasil Card — Fintech / Digital Bank
Feb 2024 – Aug 2025

Developed and evolved the digital bank's **Flutter App** (**+10M downloads** and **4.7** ⭐ **on the App Store**), delivering critical financial journeys: **Pix, Boleto, Credit Card, and Additional Card** with Primary/Dependent hierarchy and real-time limit adjustment via Core Banking integration. Engineered the **Agile Loan** product — 100% digitizing the personal credit pipeline: **real-time CET/IOF** calculation engine, dynamic contract generation (**PDF Rendering**) with digital signature, and fraud validation via **device fingerprint**. Utilized **BLoC, Cubit, and GetX** for reactive state management; ensured quality via **Widget Testing, integration_test, and Mocktail**; **CI/CD** pipeline via **CodeMagic** and monitoring with **Firebase Crashlytics**.

### Front-End Developer — Porto Seguro — Insurance · Contract
Jul 2023 – Dec 2023

Developed **+20 high-conversion campaign SPAs** in **React.js and TypeScript**, translating **Figma** prototypes into reactive interfaces that reached **millions of insured clients** in the Porto Seguro portfolio. Executed **A/B Tests** and monitored **Retention and CTR** metrics to iteratively optimize conversion journeys and reduce campaign churn. Managed global state with **Zustand and Context API**; developed standardized components within the corporate **Design System**; E2E test coverage with **Cypress**; deployments via **CI/CD** pipeline with DevOps teams.

### Mobile & Front-End Engineer — TIVIT — IT Consulting
Oct 2020 – Jun 2023

Evolved from Junior Developer to Mid-Level Engineer over almost 3 years at **TIVIT** (which acquired **Lambda3** in 2022), working on **5+ B2B projects** with **Flutter Apps** (iOS/Android) for multiple clients. **Clean Architecture, SOLID, and MVC** via **Flutter Modular**; state management with **BLoC, Cubit, GetX, Provider, and Riverpod**; agile ceremonies (**Scrum / Kanban**). Key delivery: **FMC Sales App** with **Offline-First and Delta Sync** bidirectional architecture for field teams without connectivity, financial engine for **Barter** operations (volatile commodities), and real-time **KPIs and SIP** dashboards. Quality assurance via **Golden Tests, Widget Testing, Flutter Test, and Mocktail**; web testing with **Jest / RTL**; **REST APIs** and **Firebase** integrations (Auth, Firestore, Cloud Functions).

## ARCHITECTURE & PRODUCT PROJECTS (OWNER)

### Curto PRO ↗ curtopro.com
**Python · FastAPI · React 18/TS · Chrome MV3 · Redis · Supabase · Cloudflare · N8N**

**SaaS** platform for Cartola FC analysis and lineup scaling. **Chrome MV3** extension with **OAuth** interception, **FastAPI** API with **Circuit Breaker** and **Redis** rate limiting, **React/TypeScript** SPA, and proprietary **VPS** infrastructure with **Cloudflare**, **GitHub Actions** CI/CD, payment gateway, and Telegram bot.

### MitoIA ↗ mitoia.com.br
**Python · Gemini 2.5 Flash · YouTube API · ThreadPoolExecutor · Supabase · FastAPI · Cloudflare**

**AI** engine for Fantasy Sports processing 500+ videos/round via **Gemini 2.5 Flash** + **YouTube API** with 10 parallel workers (**ThreadPoolExecutor**), phonetic **NLP** normalization (300+ mappings), greedy lineup optimization engine, and domain management via **Cloudflare**.

## EDUCATION

**Software Engineering — Full Stack & DevSecOps**
FIAP - Faculdade de Info. e Adm. Paulista — 2022 – 2026

**Accounting Technician**
ETEC Prof. Camargo Aranha — 2020 – 2022

## CERTIFICATIONS

- **Top 12 NEXT FIAP (×2):** Best Projects of the Year
- **Flutter Specialization:** +148 hours.
- **React.js Specialization:** +298 hours.
